

# Welcome to TipHaus!

## What is TipHaus?

Tiphaus automates tip distribution between employees. This allows for easier and more accurate tip sharing, tip pooling, and anything else gratuity related. By syncing with your Point-of-Sale device, TipHaus can perform calculations automatically, with 100% accuracy, in real time!

## Why does this matter to me?

TipHaus believes in transparency, and that all employees should understand how their money moves, and what their finances are in real time. You can register for our free mobile app and track your money! You'll be able to:

- See real time earnings, take-home and worked shifts
- See where every penny of your tips earned gets distributed
- Transfer money to other employees
- And more!

## How do I get started?

It's simple! If your email is in your POS, you can quickly auto register yourself. If it is not, or you don't remember which email you used, simply let your manager know your preferred email and they can manually invite you.

Simply scan this code  
or go to [my.tiphaus.com](https://my.tiphaus.com)

From there, click 'Register' and follow the steps. If your email is in the system, we will pick it up. If not, give your manager the email you want to use!

Pro Tip: Add the web app directly to your phone by clicking the Share > Add to Homescreen button on iPhone or Android.
